Professional Summary

SEO-focused Digital Marketing Executive with nearly three years at D4 Interactive, working on organic growth for ContentStudio, a B2B SaaS social media management platform. I lead the product's off-page SEO: 400+ backlinks from 350+ referring domains through publisher partnerships, listicle inclusions, link insertions and broken-link opportunities, during which Moz Domain Authority rose from 37 to 48. I also optimise blog, feature and comparison pages around search intent, organise content into clusters with clear internal linking, and structure content so search engines and AI answer engines can interpret it. Alongside SEO, I manage the brand's review-platform presence and relaunched its affiliate programme. Practical working knowledge of technical SEO fundamentals.

Core SEO Expertise

Off-Page SEO: link acquisition, publisher partnerships, guest posts, listicle inclusions, link insertions, broken-link building, competitor backlink analysis, negotiation

On-Page SEO: keyword research, search-intent mapping, content optimisation, feature and comparison pages, metadata and heading structure, FAQs, internal linking, breadcrumbs

Content Strategy: content clusters, parent and child page structure, topical authority, competitor and content gap analysis

AEO / GEO: Answer Engine Optimization, Generative Engine Optimization, answer-first content, FAQ and Article schema, entity coverage, AI search visibility monitoring

Online Reputation Management: G2, Capterra, Trustpilot, review-platform and directory listings, NAP consistency, customer review campaigns

Technical SEO fundamentals: Google Search Console indexation and crawl errors, XML sitemaps, redirects, canonical tags, broken links, basic Screaming Frog audits

Professional Experience

D4 Interactive — Rawalpindi, Pakistan

SaaS company behind ContentStudio, Usermaven, ContentPen and Replug

Digital Marketing Executive — **Jan 2024 – Present**

Product: ContentStudio. Focus: SEO and organic growth.

Off-Page SEO and Link Acquisition

- Run ContentStudio's link acquisition end to end, from prospecting, site vetting and contact research to outreach, negotiation, placement and follow-up. Secured 400+ backlinks from 350+ referring domains (median DR ~70) between Oct 2024 and Jul 2026.
- Moz Domain Authority rose from 37 to 48 within a year while I led off-page SEO, supported by listicle placements, link insertions and co-marketing partnerships with SaaS brands including Zapier, Make.com and HubSpot, where each side featured the other's product in relevant roundups.
- Point links at commercial, comparison and parent pages for competitive terms such as "social media management tools" and scheduler and analytics keywords, so authority builds where rankings affect sign-ups.
- Build ongoing relationships with publishers, SaaS brands, marketing agencies and SEO partners. Source new opportunities through competitor backlink analysis and broken-link research, proposing relevant ContentStudio pages to replace dead resources.
- Negotiate and manage paid collaborations with publishers and influencers, including product walkthrough videos, and manage sponsored editorial placements that generate revenue for ContentStudio.

On-Page SEO and Content Strategy

- Optimise blog content using keyword research, search intent and competitor analysis, improving metadata, headings, FAQs and structure so each page answers the queries it targets.
- Research keywords and competitors before building or improving feature and comparison pages, including pages targeting competitor-related queries.

- Organise content into clusters with clear parent and child pages, strengthening internal links and breadcrumbs between related articles and commercial pages.
- Worked with two content writers on a blog programme that grew organic blog traffic by about 100K over 2025–26.

AEO / GEO and AI Search Visibility

- Restructure articles for answer engines with question-led headings, direct answers, FAQ sections, entity context and FAQ/Article schema, so information is easier for search engines and AI systems to extract.
- Prioritise listicle outreach by checking which roundups rank in Google and which are cited in AI-generated answers for money keywords, then pursue inclusion on those pages.
- Monitor how ContentStudio appears in AI-generated answers and strengthen the third-party mentions and reputation signals those answers draw on.

Online Reputation Management

- Listed ContentStudio on relevant review platforms and business directories, claimed unverified profiles and kept name, address and contact details consistent.
- Coordinate with existing customers to encourage reviews on G2, Capterra, Trustpilot and other platforms, strengthening the brand's third-party presence.

Affiliate Programme Growth (from Sep 2026)

- Took over and relaunched the affiliate programme: rebuilt the programme pages and terms, moved to tiered commissions, set up new FirstPromoter campaigns and refreshed the affiliate asset library.
- In the first two months (Sep–Oct 2026), about 150 new affiliates joined, affiliate clicks rose 56% on the previous period and about 100 sign-ups came through affiliate referrals. Affiliate revenue grew from $8K to $13K as referred users converted to paid plans.

Digital Marketing Intern **May 2023 – Oct 2023**

- Ran competitor analysis, secured 30+ backlinks through guest posts and partnerships, and wrote SEO blog content for ContentStudio.
- Managed ContentStudio's social media channels: created and published content to build brand awareness and answered customer queries.

Tools and Platforms

SEO: Ahrefs, Semrush, Moz, Google Search Console, Screaming Frog (basic audits)
Analytics: Usermaven, Google Analytics
Outreach: Hunter.io, Snov.io, Saleshandy, Closely
